

**SOUND PROOF REDUCTION**

**速度：**  
大大減少了翻新時間；由於在地板鋪設之前安裝了隔膜，因此可以不間斷地工作。

**SPEED:**  
drastically reduces renovation times; since the installation of the membrane until the laying of the flooring it is possible to work without interruption.

**通用性：**  
保證安裝在任何支撐上，即使尺寸很大。

**VERSATILITY:**  
guarantees installation on any support, even of very big size.

**隔音：**  
僅3毫米就可實現非常高的降噪效果。

**SOUNDPROOFING:**  
in just 3 mm, a very high noise reduction is achieved.

# PRODESO® SOUND SYSTEM

最大的生活舒適度。

PRODESO®隔音系統是一種可在瓷磚下方使用的抗裂和隔音墊，可將腳步聲產生的聲波降低17 Db。得益於其與PRODESO®隔音系統的解耦功能，可以在不拆除舊地板的情況下翻新房屋。只需將隔音墊粘在舊地板上並直接粘貼在新地板上即可，而不必按照原先設計。該系統由Progress Profiles設計，具有許多優勢，可確保最大程度的安裝靈活性並能長期保護地板。

剖析圖

Maximum living comfort.

**PRODESO® SOUND SYSTEM** is an uncoupling and sound-proofing membrane to be applied under the tile, which reduces of 17 Db the acoustic wave produced by footsteps. Thanks to its uncoupling function with PRODESO® SOUND SYSTEM it is possible the renovation of houses without removing the old flooring; it is enough to glue the membrane on the old flooring and directly on it, the new one, without being obliged to respect any expansion joints. The system, designed by Progress Profiles, offers a lot of advantages which guarantee maximum installation flexibility and protection of the flooring over time.
